

AUTONOMOUS IS THE FUTURE FOR TURF MAINTENANCE

WITH **ECHO** ROBOTICS

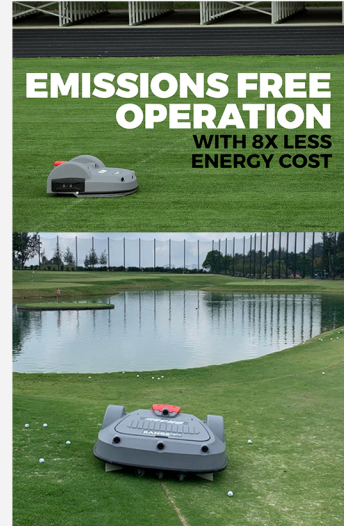

The first ECHO RP-1200 has arrived in South-east Asia. Powered by Lithium batteries, this light-weight robotic ball picker is fully autonomous, emissions free and quiet in operation. The RP-1200 can be programmed to work in high-density areas of your driving range. All of this is now available in the palm of your hands by either using the Smartphone application or the online portal.

Keep your Driving Range open around the clock. The TM-2000 Turf Mower and the RP-1200 Range Picker operate in tandem, 24/7, day or night which reduces downtime and customer inconvenience.

We recently have been appointed by ECHO Robotics as their distributor for Hong Kong, Macau, Singapore, Malaysia, Cambodia and Vietnam.

“ECHO Robotics is the global leader in commercial robotic mowing and ball picking and synonymous with innovation and pioneered ground-breaking products,” said Danny Potter. “We are extremely proud to be associated with such a forward-thinking company as ECHO Robotics. We believe that their products move the sports-turf and driving-range management into a new era.”

BUNKER RENOVATIONS COMPLETE AT DISCOVERY BAY GOLF CLUB, HONG KONG.

Discovery Bay Golf Club has just completed a full 9-hole renovation on their ‘Jade’ course and this will re-open at the end of 2021. Capillary Bunkers was installed in these bunkers and has already proven to be a huge benefit. Sand contamination and washouts have been eliminated with this new installation and as a result Eric Liu, Golf Course Manager, plans to install Capillary Bunkers in the remaining 18-holes at Discovery Bay Golf Club in the future.

The ‘Wash Box’ is a new feature by Capillary Bunkers and this was installed in all the bunkers also. If any debris enters these bunkers, this new feature allows the bunker sand to be washed by removing any silt, algae or unwanted material from fertiliser or soil amendments.

Centaur Asia Pacific is the exclusive distributor for Capillary Concrete range of products in Queensland State of Australia, Hong Kong, Macau, Singapore, Malaysia, Brunei, Indonesia, Vietnam, Cambodia and Thailand.

Eco BUNKER build it once

Get the Edge with EcoBunker

The installation of EcoBunker has continued at The Shek O Country Club as part of their ongoing bunker renovation programme. EcoBunker has been installed at varying heights and this has greatly improved the aesthetics of the bunkers as well as providing a structurally proof bunker edge. This revetted style of bunker compliments and matches this Links styled golf course.

With recent periods of extremely heavy rainfall, washouts and sand contamination has been reduced significantly and this has proven to be a huge time and money saver for the golf course maintenance team at The Shek O Country Club.

Seletar Country Club, Singapore welcoming their newest Fan

Seletar Country Club welcomed their first TurfBreeze Fan in April 2021. The addition of the TurfBreeze Fan will help to move excess moisture created by the waterfall and help to keep the canopy dry. Many golf courses suffer from a lack of air movement resulting in stressful turf conditions.

TurfBreeze Golf Fans generate all-important air movement...an essential component in aiding healthy turf for golf course greens, tees and fairways.

Starting Strong in Australia!

Continuing the success of Centaur Asia Pacific into his native Australia has long been a dream for our Founder and Owner Danny Potter. Now with three successful offices opened in South East Asia over the last 18 years, Centaur Asia Pacific (Australia) Pty Ltd opened its doors in Brisbane, Australia in 2020.

In June this year, Centaur Asia Pacific Australia was proud to showcase Capillary Bunkers, EcoBunker, Loksand and PC Drainage for the first time at the Australian Sports Turf Management Conference and Trade Exhibition held on the Gold Coast. Although there were less attendees than expected due to border closures, the event brought together a lot of the sportsturf industry leaders from across the country. Leading in Centaur's first ASTMA Trade Show we had recently started working with a number of golf courses using our Bunker Solutions including Burleigh Golf Club, Meadowbrook Golf Club, Pacific Golf Club, Keperra Country Golf Club and Toowoomba Golf Club.

"Being able to bring the best solution to the golfing industry in my hometown means a lot to me. Having developed Centaur Asia Pacific with offices in Hong Kong, Singapore and Malaysia to cater to the emerging businesses in Asia, I knew my next port of call will be Australia. We provide great products that can solve a lot of the problems that Turf Managers are also facing in Australia and I am excited to introduce them and see the incredible results we have had elsewhere."

– Danny Potter (Owner of Centaur Asia Pacific)

Centaur Asia Pacific (Australia) is the distributor for Capillary Bunkers, EcoBunker, Loksand, SubAir Systems, Turfbreeze Fan and PC Drainage in Queensland, Australia.

Capillary Bunkers

BUNKER CO
