

‘Momentous’ Step for Centaur Asia Pacific

Hong Kong: Centaur Asia Pacific has announced its first CapillaryFlow bunker installation project in Vietnam.

“This marks a momentous step for us at Centaur Asia Pacific, and we’re excited to provide continuous updates on the progress of this ground-breaking endeavour,” said a spokesperson for Centaur, a Full Business Member of the Asian Golf Industry Federation.

“The essence of achieving superior bunker quality is intricately linked to maintaining uniform sand moisture.

“Our patented Capillary material sets new benchmarks for bunker liners by ingeniously merging rapid drainage with effective sand moisture retention.

“This harmonious synergy results in the creation of an optimal playing surface within golf course bunkers. We stand by this commitment with a 15-year performance guarantee and an extended sand lifespan,” added the spokesperson.

While Capillary Bunker liners have been transforming golf courses across the world for a number of years, this is the first time that golf enthusiasts in Vietnam have been able to enjoy the experience first-hand of enhanced bunkers and an elevated overall golfing experience.

The spokesperson said: “We received overwhelming praise from a client (in Vietnam) following the trial installation of CapillaryFlow’s patented Capillary material.

“The trial showcased the remarkable effectiveness of Capillary Bunkers in preventing sand washouts during heavy downpours. While existing bunkers suffered significant washouts, our trial bunker remained intact, solidifying trust in the capabilities of our product.

“Capillary Bunker liners eradicate concerns such as washouts, flooding, soil contamination, moisture inconsistencies, plugged ball lies, and frequent sand replacement.

“These liners guarantee sustained performance and playability, ensuring bunkers retain their immaculate allure and design integrity, while simultaneously prolonging the sand’s lifespan.”

Centaur Asia Pacific exclusively distributes the complete range of CapillaryFlow products in Australia, New Zealand, Hong Kong, Macau, Singapore, Malaysia, Vietnam, Cambodia, Thailand, and many more countries throughout Asia.
