MI Series Mobile Controllers

MI Series Mobile Controllers

Remote access to your central control is now as convenient as the Internet, with mobile control. This software runs on your central control computer to provide remote irrigation control via a web-enabled cell phone.

The Rain Bird MI Series Mobile Controller is designed to work on a smart phone and/or tablet with Internet connectivity and offers the user far more remote options than other devices currently available in the marketplace.

Once connected to the Internet, up to 15 remote user licenses are able to simultaneously perform remote operations ranging from activating sprinklers and programs, observing a variety of status information or directly editing central control sprinkler and program data. All activity is logged for convenient review.

Available in Advanced and Professional versions, you can execute commands to turn stations and programs on and off. You can review the status of programs and stations to see if they are running, how much water is running, how long they have been running, etc. You can change a program start time or the runtime parameters of a particular station. The options available depend on the license.

System Requirements

- Windows® XP or Windows 7 32 bit
- Connected to the Site Control Computer
- Requires a web-enabled smart phone or tablet with a data plan

Software Requirements

One of the following central control systems:

- Rain Bird Cirrus™ version 6.0 or higher
- Rain Bird Nimbus™ II version 6.0 or higher
- Rain Bird Stratus™ II version 6.0 or higher
- Rain Bird Stratus™ LT version 6.0 or higher

- The SmartPump™ accessory requires purchase of the SmartPump option available with the central control system selected, and a compatible pump station.

- Central control system computer must be running Windows® XP or Windows 7 32 bit or higher.

- An Internet connection at the central control system computer is required.

  Note: The Internet connection can be a personal broadband connection (cable or DSL) or a corporate network.

Hardware Requirements

- A network interface card or modem and appropriate cabling (not included with MI Series software) may be required for the central control computer.

- **CPU:** 1.4 GHz or faster.

- **Memory:** 512 MB minimum.

- **Hard Disk:** 40 GB or more.

- A smart phone or tablet with a web browser and a data plan from your cellular provider.

  Note: Some smart phones and tablets may not be compatible with Rain Bird MI.

Other Requirements

- An adequate cellular phone signal.

Part Numbers

- MI-ADVAN
