

SUBAIR TESTIMONIAL

MIKE BOEKHOLDER

Director – Field Operations

The Phillies – Citizens Bank Park

“

... regarding your questions about our SubAir unit.

It gets us back to playing baseball on a safe, stable field much more quickly than we could without one.

We installed the unit last July ('17) and it has been a tremendous addition to our maintenance program. I'm beyond pleased with its ability to remove excess moisture from the field after rainfall events. It's literally like flushing a toilet. Dump the tarp, start the unit on suction, 8 minutes later you have no puddles or ponding on the grass. Easy as that.

...One of the best features of our unit is the new HMI touch screen control unit SubAir is now using on their machines. It's the brains of the system and it is quite the setup. It allows us to customize our run schedules with a few easy programming steps that are all very intuitive. It's about as easy to program as using an iPhone. The really nice thing about the HMI is that it can be easily customized to your own situation.

...I can't say enough good things about their product support.

...I will say that the HMI controls make this system much more user-friendly and flexible than anything SubAir has ever had in the past.

SubAir Sport

We may not be able to guarantee you blue skies and goals but we can ensure superior field conditions. Superior surface and subsurface aeration. Optimal moisture removal. Incredible results.

With SubAir

Without SubAir

CONTROL FIELD CONDITIONS

- ✓ Removes Moisture
- ✓ Heat the Field
- ✓ Adjust Field Firmness
- ✓ Maximize Durability

INCREASE PLAYER SAFETY

- ✓ Consistent Playing Field Surface—Year After Year
- ✓ Maximize Turf Recovery After Games
- ✓ Eliminate Puddles
- ✓ Adjust Field Firmness

EXTEND THE SEASON

- ✓ Activate Grass Growth Early
- ✓ Support Grass Growth in Extreme Temperatures
- ✓ Condition Field While Covered
- ✓ Protect from Freezing*

*with hydronics and turf covers

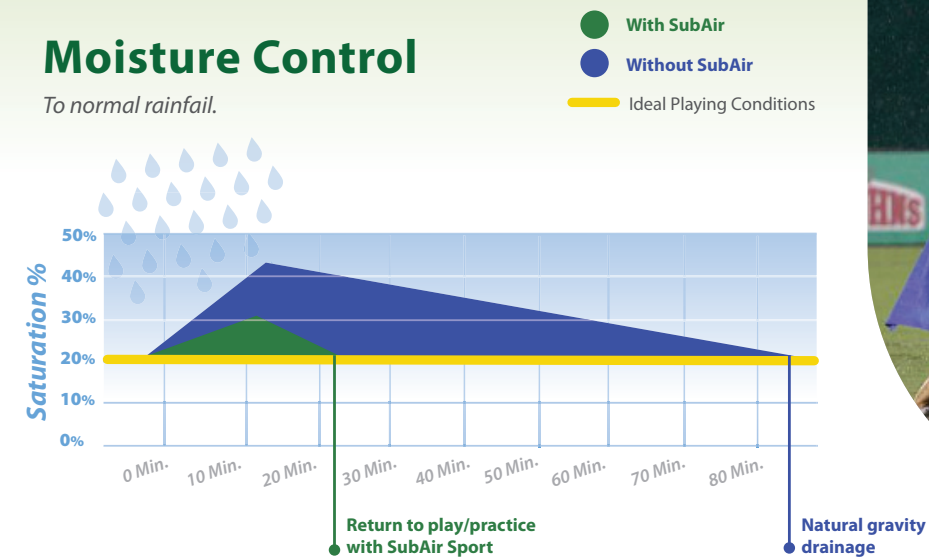

RESULTS AND BENEFITS

- ✓ In **3 minutes** SubAir removes more moisture than a gravity drain field can in 1 hour.
- ✓ Maximize uninterrupted outdoor practice days late into the season.
- ✓ Maximizes player safety by increasing traction.
- ✓ Extends growing at the beginning and end of the season.
- ✓ Gain more control over the hardness of the playing surface.
- ✓ Maximize durability and reduce scarring by controlling ideal field firmness and consistency.
- ✓ Rapid removal of water provides consistent playing conditions regardless of inclement weather.
- ✓ Prevents surface and subsurface freezing reducing noncontact injuries.

Moisture Control

To normal rainfall.
